

SOLUTION - Clue 3

Treasure Hunters Training

The Clue provided hints as to what cipher should be used:

1. The photo you clicked on has a rail fence.

The Rail Fence Cipher is a transposition cipher - it rearranges the letters in the encrypted message using a system.

2. "A treasure hunt clue can zig then zag at times."

- The Rail Fence Cipher is sometimes called the Zig Zag Cipher.

3. "Mind the wise old owls."

- A Rail Fence Cipher uses a table of two or more rows. The Clue photo has three owls sitting on the fence - a hint to use three rows.

The series of letters: L F D I O K O O D T E X O R I S

can simply be plugged into a blank three row table with 16 columns as:

L				F				D				I			
	O		K		O		O		D		T		E		X
		O				R					I			S	

Solution: Look For
Oddities

This is another great tip
for treasure hunting
success!
