

## HINT 1 - Clue 3

## Treasure Hunters Training

The photo you clicked on is an image of the most common name of the cipher you need to use.

Let's suppose another team of hunters posted the following on The Hunt For Good Facebook page as their answer during a real hunt.

They got the size of the table correct but plugging in 16 three-letter words in the columns isn't the solution. Strangely, though, if they rearranged four of their words, they'd have it!

D	T	T	P	F	S	E	G	L	A	S	A	I	G	H	A
Y	O	W	A	U	O	K	O	I	D	K	T	R	E	I	X
E	Y	O	R	R	N	E	D	E	Z	I	E	K	M	S	E

TIP: During a real hunt, don't put too much stock into what other teams are posting on Facebook. They MAY offer helpful leads, or they may be heading down a rabbit hole. . . .or maybe, just maybe, they are purposely trying to mislead other teams so they can get the advantage.

And although the second paragraph above the table is true, it simply complicates a simple cipher.
